

# York University School of Nursing

The School of Nursing  
cordially invites you to attend the

## 2<sup>nd</sup> Entry BScN Information Session

Thursday November 13, 2014  
5:30pm – 7:30pm

**Location:** Vari Hall B

The full time 2nd-Entry BScN program has been developed in response to an increasing demand for nursing programs which build on prior university learning. The possibility for program transfer within York University is available to students who have completed a minimum of 60 credits towards any university degree and who meet the program pre-requisites. By studying in the concentrated and continuous six semester program, students can complete their BScN in two calendar years.

This information session will provide an overview of the program and give interested students an opportunity to ask questions that they might have about completing their BScN at York.
