

AP/SOSC 4147 Health and Place

REGISTER NOW for this
Fall/Winter 6 credit course

One of the best things I loved about this course was the group assignment as I got to work with some great people, do field work, analyze, and observe.

I used knowledge gained over 4 years at York plus new research skills to better understand how place impacts and shapes health within our own community.

This class helped me learn how to analyze statistics and local evidence. It teaches students how to code and build a website.

Prof Davies gives students freedom and autonomy to pursue their final course projects. This inspired me to pursue my MA at YorkU.

A career development, resume building experience. Produce your own research and end your BA with an unforgettable, fun and life changing course.
